The Psychometrics Centre

---

## How psychological digital footprints change our understanding of cyberspace

---

Professor John Rust

---

# Liberal Democracy in recession

---

- The Perfect Storm
  - Personal data harvesting ('psychographics' or 'quizzes')
  - Market segmentation and micro-targeting
  - Digitally applied behavioural science (Nudge)
  - Disruption of traditional news media
  - Chasing virality (fake news and emotions)
  - Machine Learning and AI
- ... is happening in Cyberspace
  - But where is that?

---

# Elements

---

- The Threads
  - *Computer Science: Machine Learning, AI*
  - *Information science and big data analytics*
  - **Obtain psychological metadata from digital footprints**
  - **Micro-target with psychographic segmentation**
  - **Behavioural Science: nudge, emotion, Psy Ops**
  - **Psychometrics; Ancient and Modern**
  - **Cyber threat, Cyber action and Cyber science**

# Utopias and Dystopias

B. F. Skinner, *Walden Two* (1948)

“Utopian society is possible, but only through behavioural engineering. Human beings are sometimes selfish, greedy and mean. Human nature must be changed, engineered so that people are non-competitive, happy and harmonious. Positive rewards can change both outward behaviour and inner motives. People can be ‘conditioned’ to live together in peace and harmony.”

George Orwell, *1984* (1948)

“For, after all, how do we know  
- that two and two make four?  
- or that the force of gravity works?  
- or that the past is unchangeable?  
If both the past and the external world exist only in the mind, and if the mind itself is controllable – what then?”

# Behavioural Science: “The prediction and control of behaviour” (*B. F. Skinner, 1904-1990*)

# Cognitive Behavioural Therapy (CBT)

- “CBT is based on the belief that thought disorders and maladaptive behaviours play a role in the development and maintenance of psychological disorders.”
- Who decides what counts as a ‘thought disorder’ or ‘maladaptive behaviour’?
- E.g. Is ‘Not being able to see the obvious advantages of a communist system’ a thought disorder?

# The nudge initiative in politics

- “Improving decisions about Health, Wealth and Happiness” (Thaler and Sunstein, 2008)
- Soft paternalism: to encourage people to remedy ‘incorrect behaviour’ by covert means: E.g.
  - Not saving enough for retirement
  - Eating too much junk food
  - Smoking
  - Not getting vaccinated
  - Excessive use of energy
  - Not recycling your rubbish

# The UK Behavioural Insights Team

- House of Lords Report (2011) “(Nudges) prompt choices without getting people to consider their options consciously, and therefore do not include openly persuasive interventions such as media campaigns and the straightforward provision of information”
- Cabinet Office (2014) “The Behavioural Insights Team, often called the ‘Nudge Unit’, applies insights from academic research in behavioural economics and psychology to public policy and services.”

## Those at risk

- Health
  - Eating disorders
  - Lifestyle
  - Depression
- Behaviour
  - Dangerous driving
  - Substance abuse
  - Bullying

## Those who place others at risk

- Criminals
- Terrorists
- Cyber-criminals
- Sex offenders
- Fraudsters
- 'Insider Threat'

# Brave New World (Aldous Huxley, 1932); Revisited (again)

---

Records of health, education, crime, tax, credit, spending, travel, work, genealogy, internet and mobile use, location, webcams

All along the digital superhighway, you will be nudged

- In the interests of your health, welfare and the environment.
- And to protect society, should you in any way present a threat
- “If you have nothing to hide you have nothing to fear”

*(William Hague, UK Foreign Minister, 2013)*

# Psychometrics in the online age

- Online prediction
- Your digital footprint consists of items that can be analysed psychometrically
- This predicts your behaviour
- Online control
- These predictions determine what you see (and don't see)
- This determines your behaviour
- **The world is being change**
- **But what is it being changed into?**

# The classic conundrum

Samuel Taylor Coleridge  
(Table Talk, 1831)

*If men could learn from  
history, what lessons it  
might teach us!*

*But passion and party  
blind our eyes, and the  
light which experience  
gives us ... .. is a  
lantern on the stern  
which shines only on the  
waves behind.*

# Psychometric Prediction

... with the best of intentions

# MERITOCRACY

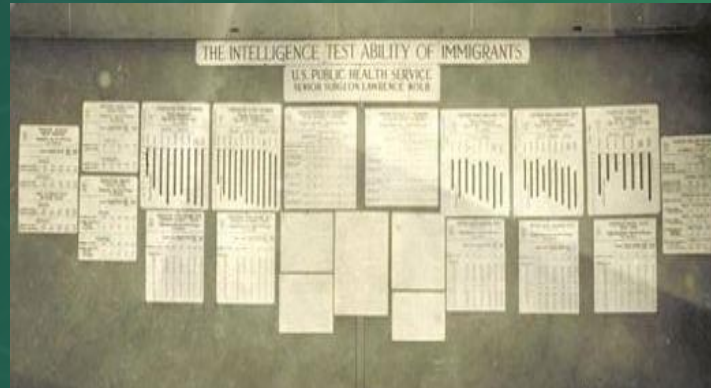

## ... and also the worst

### DISCRIMINATION

*What is 'fair' to individuals can be unfair to groups*

*Immigration (Ellis Island),  
sterilization of the 'unfit',  
euthanasia*

6. [REDACTED] - (W) - Resident Buncombe County  
Proceedings instituted by George H. Lawrence, SPW  
Medical history by H. C. Whams, M. D.  
Sterilization recommended by Dr. Whams  
Social history:  
Married woman, [REDACTED] years of age, who is the mother of 3 children ranging in ages from [REDACTED] to [REDACTED] years. On a psychological examination given by Dorothy Hamilton she was found to have an I. Q. of 56. The family has been financially dependent for many years and there is a history of inter-marriage with Indian and Negro.  
Diagnosis: Feeble-mindedness  
Operation will be performed by surgeon on staff of Baltimore Hospital at time of delivery.  
Consents: Consent is signed by [REDACTED], patient, and by [REDACTED], husband.

# Psychometric revolutions

## Innovation

- Examinations
- Mental Tests
- Online testing
- Adaptive Testing

## Intended consequences

- Meritocracy
- Diagnosis
- Instant results
- Efficiency

# Taking our eyes off the ball

## Innovation

- Examinations
- Mental Tests
- Online testing
- Adaptive Testing

## Unintended consequences

- Discrimination
- Eugenics
- Cyber insecurity
- Artificial Intelligence

# Openness

## Openness-to-Experience

I am always on the lookout for  
new ideas to explore

## Conventionality

I stick with tried and tested  
ways of doing things

# Conventionalism

# Conscientious

## Detail conscious

If you get the details right  
everything will come out fine.

## Seeing the bigger picture

I prefer to leave the boring  
details to my staff

# Disorganised

# Extraversion

## Extraversion

I can be the life and soul of any  
party

## Introversion

I have my best ideas when I am  
left alone

# Introversion

# Agreeableness

## Tendermindedness

I will always try and help my friends when they need me

## Disagreeable

I have a special ability to make tough decisions when needed

# Toughmindedness

# Neurotic

## Emotional

I get anxious when I have to  
make difficult decisions

## Unemotional

I am more able than most to  
cope with disaster

# Stable

# Temperance

## Patience

I am slow to anger and calm in  
the face of adversity

## Hostility

I am sometimes impatient  
with the foibles of others

# Anger

# Justice

## Fair-mindedness

I am balanced and impartial in  
decision making

## Subversion

I tends to be suspicious of the  
intentions of others

# Envy

# Charity

## Generosity

I am honest and open in  
dealings with other

## Covetousness

I am occasionally prone to  
elaborate or distort the truth

# Greed

---

# What and where is Cyberspace?

---

- “There is no need for cyberspace. All internet related things can be handled with existing conceptual categories. The internet has nothing to do with technology. It is just a person talking to another person, using a different technology”. (*Souls writing on the net, Giancarlo Livraghi, 2001*)
- “Cyberspace is an interactive domain made up of digital networks that is used to store, modify and communicate information. It includes the internet, but also the other information systems that support our businesses, infrastructure and services”. (*UK Cyber Security Strategy, 2011*)
- “For now we see through a glass, darkly; but then face to face. Now I know in part, but then shall I know even as also I am known”. (*St Paul , Letter to the Corinthians 13: 12-13*)

# Seeing through a glass darkly

---

# Cyberspace with or without Big Brother

---

Communication

Big Brother

The book cover of "1984" by George Orwell. It features a close-up, high-contrast image of a human eye, looking directly at the viewer. The text is overlaid on the image in a bold, black, sans-serif font.

**WAR IS PEACE  
FREEDOM IS  
SLAVERY  
IGNORANCE  
IS STRENGTH  
1984**

# The Cyber Oracle

# The Cyber Babel

# Machine Learning in Cyberspace: Lighting the fire

Neural Networks

Prometheus

Inside the Black Box

# Human/machine interaction in Cyberspace

---

- Using
  - What you look at or search for online
  - Where you are
  - What you click on, like, dislike or share
  - What you write in texts, tweets and emails
  - The images and videos you paste
- Machines can learn:
  - How much money can safely be lent to you
  - Your likelihood of committing a criminal or civil offence
  - What advert to show you to maximize make you more likely to buy
  - What news to show you to change your mind
- And can respond to masses of people simultaneously in real time

## XAI (eXplaining AI)

---

“As a society, we must be able to look into the ‘black box’ of big data analytics in order to ensure that any particular analytics application can be safely installed and will benefit us all”.

European Data Protection Supervisor Opinion, July 2015  
“Meeting the Challenges of Big Data”

# Denizens of Cyberspace

# Escaping the Pied Piper Pandora's Box

Hope left in

# The wake-up call

There is a fine line  
between faith and foolishness.  
Standing on the railway tracks  
in a darkened tunnel  
and believing the light heading your way  
to be an angel sent from heaven  
is an act of faith.  
Ignoring the warning whistle  
of the freight train  
believing it to be the angel Gabriel blowing his horn  
is just plain foolish.
